## Technical Specifications

## KGN Level Electrodes

**KGN Pillinger Level Electrodes are individually manufactured to meet the exacting requirements of the building services and water industries specifications.**

The Level Electrode head is manufactured from a Stainless Steel bar - L200mm x W12mm and attached to a PVC double insulated 21/0.3mm flexible cable.

The junction between the head and cable is protected with adhesive lined heat shrink insulation sleeves.

Each electrode is supplied complete with a dome cap fixing, fitted with a compression gland to enable simple adjustment and removal for maintenance purposes.
